Linear Accelerator Treatment Suite 1, CSMC Outpatient Cancer Center

THE WIEHLE-CARR APPROACH

Derived from careful consideration of a client's needs, circumstances and budget, the designs of Wiehle-Carr produce functional and beautiful spaces that perform as a coherent whole for effectiveness and efficiency of purpose.

With award winning expertise in the adaptive re-use and upgrading of existing facilities in the healthcare field, Wiehle-Carr believes every advance in medical science and technology provides an opportunity to become more responsive to the multi-level needs of patients and the day-to-day logistics of treatment delivery. The firm undertakes a carefully focused approach to the requirements of each project, large or small, by asking the right questions of medical staff and administrators to carefully orchestrate the design-related decision process. Complete graphic design services are available to provide integral wayfinding and project branding strategies.

Wiehle-Carr brings together a highly competent team of project consultants, including the Mechanical, Electrical, and Plumbing design services.
